PROFESSIONAL SUMMARY

Full-Stack AI Engineer and Computer Science undergraduate with industry experience building AI-powered product workflows, model integrations, secure APIs, and responsive web applications. Develops production-minded systems across React, TypeScript, Python, backend services, databases, testing, and containerized delivery.

EXPERIENCE

Wexa AI

Apr 2026 - Present

SDE Intern

- Build full-stack features for AI productivity applications spanning editors, search, external integrations, and persistent user workflows.
- Contribute to AI model integration, discovery, fallback handling, tool calling, and reliable rendering of heterogeneous tool responses.
- Develop reusable React/TypeScript interfaces and backend services; add regression tests and validate application and Docker builds.

Xelron AI

Feb 2026 - Apr 2026

AI Intern

- Designed and refined prompts for AI workflows, improving consistency and alignment with client requirements through structured iteration.
- Collaborated with US-based clients and a cross-functional team to investigate project challenges, evaluate solutions, and incorporate feedback.

EDUCATION

Indian Institute of Information Technology (IIIT) Kottayam

2022 - 2026

Bachelor of Technology in Computer Science and Engineering

Kerala, India

Narayana Junior College

2020 - 2022

Intermediate (MPC)

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, C++, C, SQL, HTML/CSS

Full Stack: React, Next.js, FastAPI, Node.js, Express, tRPC, REST APIs, Tailwind CSS

AI & Data: Gemini, Vertex AI, TensorFlow, ONNX, Scikit-learn, RAG, PostgreSQL, pgvector, MongoDB, Redis

Engineering: Docker, GitHub Actions, Git, Vitest, Playwright, Pytest, Prometheus, Sentry, AWS S3/Cloudflare R2

RELEVANT COURSEWORK

- | | | | |
|---------------------|---------------------|--------------------|-------------------------|
| • Data Structures | • DBMS | • Cloud Computing | • Computer Architecture |
| • Operating Systems | • Computer Networks | • Machine Learning | • Compiler Design |

PROJECTS

CareerPilot AI | [Next.js](#), [TypeScript](#), [PostgreSQL](#), [pgvector](#), [Gemini Live](#) | [GitHub](#)

Jul 2026

- Built a multi-tenant career workspace with role-aware pipelines, document workflows, explainable fit scoring, and tenant-scoped RAG.
- Implemented signed object storage, rate limits, readiness/operational telemetry, and unit, PostgreSQL integration, and Playwright tests.

TrackForge | [React](#), [FastAPI](#), [PostgreSQL](#), [Browser Extension Live](#) | [GitHub](#)

Jul 2026

- Unified LeetCode, GeeksforGeeks, and roadmap activity through normalized problems, recoverable imports, and durable progress tracking.
- Added migrations, authentication, security headers, structured logs, Prometheus metrics, load checks, and full-stack CI.

TomatoGuard | [TensorFlow](#), [ONNX](#), [FastAPI](#), [React Live](#) | [GitHub](#)

Feb 2026

- Rebuilt a classifier as an uncertainty-aware ML system with deterministic manifests, grouped splits, calibration, OOD rejection, and versioned artifacts.
- Implemented validated uploads, ONNX CPU inference, CAM support, API/container tests, and explicit field-validation release gates.

Vidhya Vedha | [React](#), [Express](#), [MongoDB Live](#) | [GitHub](#)

Oct 2025

- Built task-specific rural-service journeys for healthcare appointments, government guidance, bookings, dispatch, and status tracking.
- Implemented opaque sessions, CSRF protection, role authorization, ownership checks, and conflict-safe appointment scheduling.

PROBLEM SOLVING

Solved 300+ DSA problems across LeetCode and GeeksforGeeks, strengthening algorithmic problem solving and implementation speed.
